

decotric PVC/CV and Carpet Adhesive

decotric Kleber für Teppich und PVC

solvent-free, water-based adhesive

Instructions for use: *decotric PVC/CV and Carpet Adhesive* is suitable for gluing PVC/CV coverings, needle felt as well as textile floor coverings with various backings. *decotric PVC/CV and Carpet Adhesive* is suitable for chair casters to DIN 68131 and for screeds with floor heating.

Technical specifications:

Components:	terpolymer plastic dispersion, fillers, natural resin ester
Density:	approx. 1.30 g/cm ³
pH value:	6-7
Usage:	A2 indentations: 300-350 g/m ² B2 indentations: 350-450 g/m ²
GEV-EMICODE:	EC 1 – very low emission

Surface preparation: The surface must be firm, permanently dry, and free of cracks and release agents. Remove any unevenness using *AKAPLAN Smoothing Compound* for floorings or *AKAFLEX Smoothing Compound* for wooden floorings. Prime highly absorbent and sanding surfaces using *decotric Deeply Penetrating Primer – Solvent Free*.

Application:

Absorbent surfaces
Evenly apply *decotric PVC/CV and Carpet Adhesive* on absorbent surfaces or steam permeable floor coverings with a spreading comb (A2 for PVC and foam backings, B2 for jute backings) and leave for dry for 10-20 minutes and then place the flooring in the adhesive bed.

Impermeable surfaces:

By PVC-, PVC flooring and other impermeable surfaces leave for dry until the adhesive is completely dry (30-60 minutes) and then place the flooring in the adhesive bed. It is possible to weld PVC floorings after 24 hours.

The ventilation depending on the absorbency of the surface, the ambient temperature and air humidity.

Follow the flooring manufacturer's laying instructions.
Immediately remove any adhesive residues with water.
Clean tools in water immediately after use.

Do not use if the surface and/or room temperature are below + 10° Celsius!

Storage: Store in a cool place! Keep the containers tightly sealed!
