

decotric BIO Ceiling and Wall Paint, powdered decotric Decken- und Wandfarbe BIO, pulverfoermig

Powdered distemper based from natural raw materials

Instructions for use:

decotric Ceiling and Wall Paint can be used on all the usual interior surfaces – such as lime, cement and gypsum plaster, concrete and gypsum boards. *decotric Ceiling and Wall Paint* is made from natural raw materials and is does not contain preservatives.

Technical specifications:

Components:	Cellulose ether, chalk
Density:	approx. 0.75 g/cm ³
pH-value:	8-9
Mix ratio:	1 kg powder with 1.5 l water
Usage:	1 kg powder for approx. 10 m ² 200 - 300 ml/m ²

Surface preparation:

The surface must be dry, firm and free of release agents (dust, grease, etc.). Make good holes and unevenness using *decofill Interior* or *decomur Super Bonding Filler*. Pre-treat highly absorbent, sanding and chalking surfaces with *decotric Deeply Penetrating Primer – Solvent Free*.

Application:

Vigorously stir *decotric Ceiling and Wall Paint* into clean, cold water and continue to stir for a few minutes. Leave to swell for 1-2 hours and then vigorously stir again and then apply with a brush or paint roller.

Ready stirred paint can be tinted in any ratio using *decolor Tinting Paint*.

Clean tools in water immediately after use.

Storage:

Store in a cool, dry place! Keep the containers tightly sealed!

Available size:

2 kg collapsible box	004103000
