|----------------------------------|--|---|
| <b>Instructions for use:</b>     | <i>decotric Adhesive for Ornamental Bordering</i> is ideally suited for pasting borders made from paper, textile and vinyl onto wallpapers, wall coverings, emulsion paints and all mineral surfaces such as plaster, concrete and masonry.  |   |
| <b>Technical specifications:</b> | Components:  | Synthetic resin dispersion                                      |
|                                  | Density:   | approx. 1.15 g/cm <sup>3</sup>                                  |
|                                  | pH-value:  | approx. 8   |
|                                  | Usage:   | The tube contents suffice for approx. 10 m borders (15 cm wide) |
| <b>Surface preparation:</b>      | The surface must be dry, firm, and free of release agents (dust, formwork oil, etc.). The existing wallpapers must adhere well to the surface.   |   |
| <b>Instructions for use:</b>     | Moisten the backs of the cut borders with water. After approx. 4-5 minutes apply <i>decotric Adhesive for Ornamental Bordering</i> . Fold the borders together, roll up and paste onto the surface after the recommended softening time. Always following the instructions for use of the border manufacturer. |   |
|                                  | Do not use if the surface and/or room temperature are below + 5° Celsius. Immediately remove any adhesive residues with water or a damp cloth. Clean brushes in water immediately after use.   |   |
| <b>Storage:</b>                  | Store in a cool place. Keep the containers tightly sealed.   |   |
| <b>Available size:</b>           | 250 g PE tube  | 001206001   |
