

decotric Wallpaper Base Primer ‘Tapeten-Wechselgrund’

decotric Tapeten-Wechselgrund

Wall treatment for simple wallpaper removal, allowing problem-free, clean and repeated wallpaper replacement

Instructions for use: *decotric Wallpaper Base Primer* is particularly suitable for plasterboard and for all absorbent interior surfaces, such as concrete, plaster, etc.

Technical information:

Components:	Paraffin, styrene acrylate dispersion
Density:	1.0 g/cm ³
pH value:	8-9
Coverage per m ² :	1 l is enough for approx. 10-20 m ² (depending on substrate)

Surface Preparation:: The substrate must be dry, stable, and clean. Tidy up cracks and holes using *decofill Interior* or *decomur Super Bonding Filler*. Remove old peeling paint and distempers completely using *decotric Wallpaper Remover*. Remove loose plaster. Strongly abrasive and chalky surfaces should be primed with *decotric Deeply Penetrating Primer – Solvent Free*.

Application: Shake container before use!

Apply *decotric Wallpaper Base Primer* to the substrate before papering using a ceiling brush or an airless spray unit. On strongly absorbent substrates and plasterboard, use *decotric Wallpaper Base Primer* undiluted. On weakly absorbent substrates, dilute *decotric Wallpaper Base Primer* 2:1 with water. Apply evenly.

Allow to dry for 6-12 hours depending on humidity and temperature before papering as normal, e.g. with *decotric Wallpaper Paste*. When using *KVS Cellulose Wallpaper Adhesive* for paintable wallpapers (e.g. woodchip), 20% *decotric Wallpaper and Border Adhesive* must be added to the stirred paste.

Do not use if the temperature of the room or substrate is below 5°C. Clean tools with water immediately after use.

Replacing wallpaper:

Free up the upper edge of the old wallpaper using a scraper or knife and peel off in strips. Remove difficult to remove pieces of wallpaper – a result of unevenness of the substrate or possibly too thin application of Wallpaper Base Primer – using *decotric Wallpaper Remover* or *decotric Woodchip Power Remover*.

Storage: Store in a cool and frost-free place! Keep the container tightly sealed.

Available sizes:

1.0 l PE bottle	006504001
2.5 l plastic container	006501001
5.0 l plastic container	006502001
10 l plastic container	006503001
