

decotric Fixative for Carpets and PVC-ready decotric Teppich-Fixierung - gebrauchsfertig

Solvent-free fixative for PVC and CV coverings

Instructions for use: *decotric Fixative for Carpets and PVC* is suitable for fixing foam-backed carpeting surfaces such as attic, parquet, tiles, PVC coverings etc. Can also be used on heated floor constructions.

Technical specifications:

Components:	Synthetic resin emulsion
pH-value:	7-8
Density:	approx. 1.05 g/cm ³
Usage:	200-300 g/m ³ depending on surface

Surface preparation: The surface must be dry, firm, moisture resistant and free of release agents. Even out cracks, holes and unevenness using *AKAPLAN Flooring Smoothing Compound* or *AKAFLEX Wood Flooring Smoothing Compound* Pretreat highly absorbent and sanding surfaces using *decotric Deeply Penetrating Primer – Solvent Free*.

Parquet must have an absolutely waterproof seal.

Application: Place the flooring in the room and roughly cut. The carpet to fix must be air-conditioned, released and in flat position. Turn back one half of the covering and evenly apply decotric Carpet Fixative to the surface using a roller or brush. Place the flooring, cut to size, in the adhesive bed and uniformly press into place.

When pasting PVC or CV coverings on non-absorbent surfaces the adhesive must completely dry (i.e. the solvent evaporate) before the covering is attached. The fixative must no longer string or become threaden and must feel slightly tacky. If necessary, weigh down edges and joints.

Observe the covering manufacturer's laying instructions. Immediately remove residual adhesive with water. Clean tools in water immediately after use.

Do not use if the surface and/or room temperature are below + 5° Celsius!

If the flooring should be subsequently removed, start in the edge and slowly remove the covering. Residue adhesive can be removed with *decotric Wallpaper Remover* (250 ml Wallpaper Remover to 12 l water). Leave to take effect for approx. 15 minutes. Then scrape off the softened fixative using a stopping knife and thoroughly wash the whole area using water.

Storage: Store in a cool but frost-free place! Keep containers tightly sealed!

Available size:
