

decotric Sanitary Mould-Stop

Use:

decotric Sanitary Mould-Stop quickly and reliably removes mould and mildew stains from all washable surfaces, silicone and tile joints as well as washable emulsion paint finishes. It contains active chlorine for rapid, bleaching and disinfecting action as well as a gel formula to optimize performance, also on vertical surfaces.

Properties:

- with active chlorine for immediate action
- for washable surfaces and silicone joints
- gel formulation
- quick and reliable

Technical data:

Raw material base: Aqueous sodium hypochlorite solution < 5 % active chlorine content and auxiliary materials
 Density: 1.1 g/cm³
 pH value: 12 – 13

Application:

Carefully spray decotric Sanitary Mould-Stop onto infected surface from a distance of approx. 15 – 20 cm until continuous film has formed. Remove residue with damp sponge or cloth after approx. 15 minutes, then wash down thoroughly with water.

Consumption:

Approx. 50 – 75 ml/m²

Storage:

Store in cool, dark place in properly sealed container. Keep out of reach of children.

Disposal:

Hand over only fully emptied containers for recycling. Dispose of product residue at hazardous or special waste collection point. Do not allow to enter drains, sewers or surface waters.

Note:

Protect areas not to be treated from splashes. Sensitive and colour materials, e.g. wallpaper, carpets, textiles, wood and metals, may suffer surface discoloration. Discoloration may also occur on tiles with damaged glaze. Avoid contact with plants. Application produces slight chlorine odour which persists for up to 3 days and can be alleviated by adequate/intermittent ventilation.
