

Universal Floor Adhesive Classic

Universal-Bodenkleber Classic

solvent-free, water-based adhesive

Instructions for use:	<i>Universal Floor Adhesive Classic</i> is suitable for gluing textile floor coverings, rigid foam and polystyrene panels, PVC/CV as well as other materials in dry areas.	
Technical specifications:	Components:	styrene-acrylate emulsion, calcium carbonate, water, cellulose ether, preservative, additives
	pH value:	9-10
	Density:	approx. 1.7 g/cm ³
	Usage:	A2 indentations: 350-450 g/m ² B2 indentations: 500-600 g/m ²
Surface preparation:	The surface must be dry, clean, stable and free of separating agents like dust, grease etc. If the material to glue cannot absorb any moisture the surface must be absorbent. Prime highly absorbent, sandy or dusty surfaces with <i>decotric Primer</i> .	
Application:	Evenly apply with a spreading comb (A2 for floorcoverings with foam backings/ B2 for other floorcoverings and materials). Place the flooring in the adhesive bed within the application time of 15-20 minutes. Always follow the flooring manufacturer's laying instructions. Ensure sufficient ventilation. Immediately remove any adhesive residues with water. The ventilation depending on the absorbency of the surface, the ambient temperature and air humidity. Clean tools in water immediately after use. Do not use if the surface and/or room temperature are below + 10° Celsius!	
Storage:	Store in a cool place! Keep the containers tightly sealed!	
Available sizes:	4 kg PE tub	021202026
	15 kg PE tub	021204026
	25 kg PE tub	021205026
